

# Ju Ta Tao (Harry)

Embedded software engineer focused on RTOS, OT protocols, and system architecture.

## Contact

Taiwan  
harryju3@gmail.com  
(+886) 988-633-765

## Skills

- C / C++ / Python
- Embedded Linux
- Zephyr
- FreeRTOS
- Modbus TCP
- MQTT
- SNMP
- CI/CD
- Docker
- ARM
- AI / Deep Learning

## Work Experience

Embedded product development, industrial protocols, customer issue resolution, and cross-functional delivery.

### Moxa Inc. | Software Engineer R&D

2023 - Present

#### Product Development

- Designed embedded OT and protocol architectures.
- Developed P2P and Modbus communication frameworks.
- Maintained CI/CD workflows for legacy products.
- Optimized system reliability on constrained platforms.

#### Customer Support

- Resolved customer issues across protocol and embedded systems.

#### Collaboration

- Worked with PM, QA, and front-end teams on embedded products.

### Academia Sinica | Intern

Jul. 2019 - Sep. 2019

- Developed speech recognition web applications.

## Education

### National Chung Cheng University

2020 - 2022

M.S. in Computer Science and Information Engineering

- AI and speech recognition research using PyTorch.
- Focused on low-resource speech recognition systems.

### Chang Gung University

2015 - 2020

B.S. in Computer Science and Information Engineering

- Built AI and speech recognition projects using TensorFlow and Django.
- Developed embedded and RTOS-based ARM projects.
