

Ju Ta Tao (Harry)

Embedded Software Engineer

Embedded software engineer focused on RTOS, OT protocols, and system architecture.

Taiwan harryju3@gmail.com (+886) 988-633-765

About Me

Enjoy building reliable systems, collaborating across teams, and continuously learning new technologies. Outside of work, I stay active through basketball and enjoy exploring technical topics.

Skills

- C / C++ / Python
- Embedded Linux
- CI/CD / Docker
- AI / Deep Learning
- Zephyr / FreeRTOS
- Modbus TCP / SNMP / MQTT
- ARM

Education

National Chung Cheng University

2020 - 2022

M.S. in Computer Science and Information Engineering

- AI and speech recognition research using PyTorch.
- Focused on low-resource speech recognition systems.

Chang Gung University

2015 - 2020

B.S. in Computer Science and Information Engineering

- Built AI and speech recognition projects using TensorFlow and Django.
- Developed embedded and RTOS-based ARM projects.

Work Experience

Embedded product development, industrial protocols, customer issue resolution, and cross-functional delivery.

Moxa Inc. | Software Engineer R&D

2023 - Present

Product Development

- Served as the function owner for protocol modules across multiple embedded products.
- Designed and implemented system-level architectures for OT features.
- Designed and optimized embedded systems for resource-constrained hardware environments with a focus on stability and reliability.

Collaboration

- Coordinated with PMs, QA, and front-end teams to align customer needs and product specifications.

Customer Support

- Resolved customer issues across protocol behavior, embedded systems, and deployment environments.

Academia Sinica | Intern

Jul. 2019 - Sep. 2019

- Developed speech recognition web applications.
